Omar Elfar

Front-End Developer

01273698739 ◇ omarelfar892@gmail.com ◇ Egypt ◇ GitHub ◇ LinkedIn Profile

SUMMARY

Passionate Front-End Developer specializing in React.js with a strong foundation in JavaScript (ES6+) and modern web technologies. Experienced in building responsive, interactive user interfaces and integrating RESTful APIs to deliver dynamic web applications. Skilled in state management using Redux and committed to writing clean, maintainable code following best practices in performance optimization and accessibility. Eager to contribute to innovative projects and grow within collaborative development teams.

WORK EXPERIENCE

Freelance Front-End Developer

Jan '23 — Jul '25

Self-Employed

- Developed multiple single-page applications using React.js, focusing on responsive and interactive UI components.
- Integrated third-party REST APIs to fetch and display dynamic data, enhancing user engagement.
- Collaborated with clients and team members via GitHub, managing pull requests and issue tracking to ensure smooth project delivery.
- Optimized application load times by 40% through asset and component optimization techniques.
- Created reusable component libraries using Tailwind CSS to maintain design consistency and scalability.

React.js Developer (Personal Projects)

Jun '22 — Dec '24

Independent Projects

- Built and maintained several React.js projects including CRUD apps, dashboards, and UI clones to strengthen front-end development skills.
- Applied modern UX/UI principles to design intuitive and accessible user interfaces.
- Utilized Redux for state management in complex applications to ensure predictable and maintainable code.

SKILLS

Front-End Technologies React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Shopify

State Management Redux

Tools & Version Control Git, GitHub, npm, yarn

Web Development Practices Responsive Design, Mobile-First Development, Debugging, Browser DevTools

API Integration RESTful APIs

Supplementary Skills Next.js (basic knowledge)

PROJECTS

Prayer Times Web App, Personal Projects Link Jan '25 — Oct '24

- Built a React-based web app featuring city search and dynamic prayer times display using RESTful APIs.
- Optimized UI components for accessibility and performance using modern front-end best practices.

Chrome Extension "Kofya", Personal Projects Link Apr '25 — Jun '25

- Created a Chrome extension using React that displays daily facts about Palestine to engage users with cultural content.
- Managed extension state and UI with React hooks and ensured smooth user experience.

USMLE Genius, Medical Question Bank Web App Link May '25

- Collaborated closely with a back-end developer to build an interactive and responsive **medical question bank platform** tailored for **USMLE exam preparation**.
- Developed dynamic UI components in **React.js**, ensuring a seamless and intuitive experience for users practicing exam questions.
- Integrated **RESTful APIs** provided by the back-end to fetch, display, and manage question data, user progress, and performance analytics.
- Applied **Tailwind CSS** to design a clean, professional, and mobile-responsive interface.
- Implemented state management and handled API data effectively to ensure smooth navigation between quizzes, answers, and feedback.
- Utilized **Git and GitHub** for version control and collaborative development.

EDUCATION

Bachelor's Degree in Computer Science Engineering, Engineering Sep '21 — Present
Kafr El Sheikh

- Completed coursework in web development, data structures, algorithms, and software engineering.
- Graduated with a focus on front-end technologies and user interface design.

COURSES

The Complete JavaScript Course 2024: From Zero to Expert – Udemy

Jan 2025 — Present

Taught by **Jonas Schmedtmann**, this in-depth course covers **modern JavaScript (ES6+), DOM manipulation, event handling, asynchronous JavaScript (callbacks, promises, async/await)**, and real-world API integration. Reinforced learning through interactive projects like a budget app and a bank app.

- **React - The Complete Guide (incl. Hooks, React Router, Redux) – Udemy**
  Jan 2025 — Present

- Also by **Jonas Schmedtmann**, this project-based course focuses on **React fundamentals, functional components, React hooks (useState, useEffect, useReducer), routing with React Router, and Redux for state management**. Built several React applications with clean, maintainable code practices.
- **رواد مصر الرقمية – منحة وزارة الاتصالات المصرية**
  2024 — Present
  Awarded a prestigious scholarship by the **Egyptian Ministry of Communications and Information Technology (MCIT)** as part of the **Digital Egypt Pioneers initiative (رواد مصر الرقمية)**. The program focuses on enhancing digital skills in **software development, emerging technologies, and practical industry applications**, through collaboration with leading educational institutions and tech companies.
- **AICE (Africa's Information and Communication Technology Education)**
  2024 — Present
  Participating in the **AICE program**, designed to upskill participants in **cutting-edge technologies, digital business, and software engineering**. The program blends academic theory with industry practice, preparing candidates for the African and global tech markets.
